

What's New In Cascable Studio 7.1?

The main changes in Cascable Studio version 7.1 include:

- **Support for the Elgato Stream Deck on iPad and Mac**

Cascable Studio now supports the Elgato Stream Deck on the Mac and iPad. You can add useful actions to your Stream Deck's keys, and change exposure settings via the dials on Stream Deck Plus.

On iPad, video recording status and information about the current Shutter Robot run will be displayed on Stream Deck Plus' display.

- **Support for Shortcuts and Siri**

Cascable Studio now has a number of actions that can be used in the Shortcuts app on iPhone, iPad, and Mac. With Shortcuts, you can create limitless automations and workflows to make your life simpler.

- **Support for AppleScript on Mac**

For the super power users among you, we've also added support for AppleScript on the Mac for advanced scripting and automation.

For additional details on the new and exciting features of this release, we have a detailed rundown on our blog: <https://cascable.se/blog/cascable-71-stream-deck-shortcuts-applescript/>.
